1. Which of the following technologies in spring is used to allow an application to manipulate Java objects at runtime?
a) Weaving
b) SPEL
c) RPC
d) JCP
2. How many ways Inversion of control is executed?
a) Dependency lookup
b) Dependency injection
c) Traditional approach
d) Both a & b
3. Which of the following are core concepts of AOP?
a) Joinpoints
b) Advice
c) Pointcuts
d) All of the above
4. What is the purpose of interfaces?
a) Loose coupling
b) Reduce coupling
c) Remove coupling
d) All of the above
5. What is the abbreviation of DTO?
a) Database Objects
b) Data Transfer Objects
c) Data Objects
d) None
6. Why we use named parameters ?
a) Callable Statements
b) Statements
c) Prepared Statements
d) Transactions
7. How many ways you can configure spring dependency? (Choose two)
a) Externally in Xml file
b) Text file
c) Faces-config
d) Java annotations
e) Both A & D
8. Transaction and AOP service, message source for internationalization (i18n), and application event handling services are provided by ?
a) BeanFactory
b) FactoryBean
c) ApplicationContext
9. Which of the following is a destruction method ?
a) afterPropertiesSet
b) destroy-method attribute
c) nit-method attribute
d) None
10. When Dependency Injections are executed?
a) Coding time
b) Compile time
c) Run time

11. What is the role of Factory Pattern?
a) To provide application context
b) To provide application initiated object
c) To provide application component
d) Above all
12. Which of the following is correct related to JdbcTemplate ?
a) it is not necessary to write SQL queries
b) It is not necessary to manage connections in the application code
c) SQL queries automatically become database agnostic
d) Object relational mapping is available out of the box
13. Which of the following are ORM libraries?
a) Hibernate
b) TopLink
c) JDO
d) Above all
14. Which of the following are types of IoC containers?
a) BeanFactory
b) BeanContext
c) ApplicationContext
d) ApplicationFactory
e) Both A&C
15. Which of the following method is used to shutdown all the bean processes after closing the spring container? a) destory method
b) none of the mentioned
c) shutdownHook
d) All of the mentioned
16. Which are the attribute of bean class?
a) name
b) id
c) class
d) all of the above
17. IoC can be decomposed into two subtypes that are
a) Dependency Lookup
b) Bean factory
c) Dependency Injection
d) Both A & C
e) None
18. What is the objective of AOP ?
a) MVC logic
b) Constraint logic
c) Bean logic
d) Crosscutting logic
19. What are the advantage of Dependency injection?
a) Makes the code loosely coupled, so easy to maintain
b) Makes the code easy to test
c) Both a and b
d) None

20. Which of the following component intercepts all requests from spring MVC application? a) dispatcher servlet
b) controller servlet
c) filter dispatcher

21. Which Method used to process bean?
a) postProcessAfterinitialization()
b) postProcessBeforeInitialization()
c) scope
d) own constructor
22. What do you mean by inversion of Control?
a) IOC is a technique that internalizes the creation of management of component dependencies b) IOC is a technique that externalizes the creation of management of component dependencies c) a & b
d) None
23. Which function returns true if the array contains the specified valued?
a) test(value)
b) map(value)
c) check(value)
d) includes(value)
24. You can convert the numbers to strings with the _____ method
a) Convert
b) toString
c) numberToString
d) toFixed
25. Which is the limitation of traditional factory pattern?
a) Single Implementation
b) Multiple Implementation
c) Both a and b
d) None
26. Which of the following is true?
a) ApplicationContext extends BeanFactory
b) BeanFactory extends ApplicationContext
c) BeanFactory implements ApplicationContext
d) ApplicationContext implements BeanFactory
27. Which keyword is used to define a constant value that will not change?
a) final
b) Let
c) Const
d) Get
28. Which is not Spring own Module JAR File?
a) Aop
b) Oxm
c) primeface
d) Asm
29. Which layer is the core layer within the application and all business logic will be implemented in this layer?
a) persistence layer
b) service layer
c) presentation layer
d) security layer
30. Using named parameters is preferred due to
a) proxy pattern usage
b) low cohesion
c) loose coupling
d) improved code maintainability

31. Which of the following configuration is supported by the LocalSessionFactoryBean? a) Scanning a package to detect annoted entity classes (with @Entity)
b) Listing hibernate XML mapping configuration file (hbm.xml)
c) Listing entity classes annoted (with @Entity)
d) All above
32. Which is/are ORM frameworks?
a) Hibernate
b) EclipseLink/ TopLinIc
c) Open JPA
d) All are above
33. What is Bean Factory ?
a) An Interface
b) an Object
c) a Class
d) None
34. Why do you design to interfaces?
a) Loose coupling
b) Reduce coupling
c) Remove coupling
d) All of the above
35. What data access technology is supported by the Spring framework?
a) JDBC
b) Hibernate
c) JPA
d) Above a, b, c
36. Which is responsible for getting connection to the database?
a) Statement
b) ResultSet
c) Driver
d) Connection
37. Which of the following can be the return type of a request processing method of a controller? a) Void
b) Object
c) ModelAndView
d) A & C
38. What do you mean by “@Entity”?
a) mapped Java class
b) mapped entity object
c) mapped entity class
d) None
39. In Spring Web Flow, a flow consists of a series of steps is called

a) Model
b) Instance
c) States
d) Object
40. Which of the following are advantages of DI rather than a more traditional approach? a) Reduced glue code
b) Simplified application configuration
c) Ability to manage common dependencies
d) Improved testability
e) All of the above
Page 4 of 13
41. Which of the following is the default scope of bean?
a) Request
b) Singleton
c) Prototype
d) Session
42. What is the main benefit of using DataSource ?
a) it is possible to use a database connection pool to fetch database connection b) it is possible to directly connect to a database without using connection parameters c) it automatically enables distributed transactions
d) it facilitates logging of database queries and their results
43. Spring supports which of the following format?
a) CurrencyFormatter
b) DateFormatter
c) NumberFormatter
d) Above all
44. Which is/are the drawbacks of the Basic Factory Pattern
a) There is no way to change an implementing class without a recompile. b) There is no way simply to switch instantiation models.
c) Only A
d) Both A and B
45. Which of the following ways to inject dependency?(choose two) a) By Constructor
b) By Setter method
c) By getter method
d) By list method
e) Both A & B
46. AOP implements which of the following features?
a) Crosscutting logic
b) MVC logic
c) Constraint logic
d) Bean logic
47. Which of the following is the alternative to Spring HibernateTemplate a) Hibernate contextual sessions
b) HibernateContext
c) All of the mentioned
d) None of the mentioned
48. Which of the following layer is used for @Controller annotation? a) Session laver
b) Business layer
c) Service layer
d) Presentation laver
49. How many way we decomposed into two subtypes?
a) Dependency Injection
b) Dependency Lookup
c) Bean factory
d) A & B
50. What do you mean by DispatcherServlet?
a) DispatcherServlet is used for AOP.
b) DispatcherServlet handles all the http requests and responses.
c) DispatcherServlet is used for transaction management.
d) DispatcherServlet is used for Dependency injection.
Page 5 of 13
51. Hibernate covered common techniques for defining _____mappings? a) ORM
b) MVC
c) JVM
52. Which of the following is the persistent object, stores as records in the database. a) EntityManagerFactory
b) Entity-Transaction
c) Persistence Entity
53. Why we use jdbcTamplate? Mentioned problems of JDBC API. a) It provides you methods to write the queries directly
b) It saves a lot of work and time.
c) All of the above
54. Which of the following method return list of maps?
a) Update
b) query
c) Query For List()
d) all of the mentioned
55. How can you close the database resources?
a) Statement then Connection then ResultSet
b) Connection then Statement then ResultSet
c) ResultSet then Statement then Connection
d) Statement then ResultSet then Connection
56. How can you notify its completion of session ?
a) BindingResult
b) SessionStatus
c) Errors
d) None
57. Which method is used to delete data in JPA?
a) EntityManager.remove()
b) EntityManager.destroy()
c) EntityManager.delete()
d) None
58. What kind of framework is Spring?
a) A lightweight framework

b) A standard framework
c) An explain framework
d) None
59. What is the core principle of Spring Framework ?
a) DOC
b) JNDI
c) IOC
d) XML
60. Which of the following class maintain Hibernates session factory for spring? a) Application context
b) SessionFactory
c) method
d) None
61. The JdbcTemplate class offers template method for batch update operations.? a) batchUpdate()
b) update()
c) all of the mentioned A & B

62. What is ApplicationContext ?
a) Object
b) Class
c) Interface
d) None
63. SimpleJdbcTemplate perform batch update method in the form of What? a) Map
b) List
c) Vector
d) Set
64. jQuery is one of the most popular JavaScript libraries being used for development a) Desktop application
b) Web fronted
c) Both a and b
d) None
65. How can you Annotation for Hibernate exceptions ?
a) @Repo
b) @Repository
c) @Translation
d) None of the mentioned
66. Which of the following interface is used by the JdbcTemplate to map a resultset row ? a) Mapper
b) ValueMapper
c) RowElementMapper
d) RowMapper
67. What do you mean by CRUD?
a) Create, Run, Update, Destroy
b) Create, Read, Update, Delete
c) Create, Run, Update, Delete
d) Create, Read, Update, Destroy
68. What is the objective of Spring Dependency Injection ?
a) easier to test
b) Simple
c) easier to understand
d) All of the above
69. Which of the following module provides basic web-oriented integration ? a) Web-MVC module
b) Web-Socket module
c) Web module
d) Web-Portlet module
70. Which is the default validator of spring?
a) Spring validator
b) Hibernate validator
c) Hibernate validator
d) Bean validator
71. JdbcDaoSupport wrap up the which of the following class
a) JdbcTemplate
b) JdbcDao
c) JdbcSupport
d) None

72. Which of the following is the default @RequestMapping ?
a) GET
b) PUT
c) POST
d) None
73. POJO stand for?
a) Plain Old Java Object
b) Pre old java object
c) Plain order java object
74. Which of the following exception classes is related to all the exceptions thrown in spring applications? a) NullPointerException
b) DataAccessException
c) SpringException
d) ArrayIndexOutofBound
75. Transforming JavaBeans into XML is called?
a) Marshaling
b) Unmarshaling
76. Which of the following is/are the Spring web flow feature?
a) Flow
b) View
c) Conversation
d) All of the above
77. Which of the following is return row?
a) mapRow()
b) query
c) update
d) none
78. How many ways we can configure the ApplicationContext?
a) XML based
b) OSPEL Based
c) Annotation based
d) A&C

79. What is/are the purpose of validation?
a) Fulfills all predefined business requirements.
b) Ensure the data integrity of the application.
c) Usefulness in other layers of the application.
d) All
80. What is/are the objective of validation?
a) Fulfills all predefined business requirements.
b) Ensure the data integrity of the application.
c) Usefulness in other layers of the application.
d) All of the above
81. Which of the following is the Annotation for Controller Class?
a) @After
b) @Exception
c) @Before
d) @Controller
82. What should we do to publish a REST service with Spring?
a) publishing an applications data as a REST service
b) accessing data from third-party REST services
c) all of the mentioned

83. Which of the following method return the JDBC template?
a) getTemplate()
b) getJdbc()
c) getJdbcTemplate()
d) setJdbcTemplate()
84. Which of the following repository is used in Spring?
a) JPA
b) JDB
c) JBoss Seam
d) Velocity
85. Which of the following statements is/are correct for spring beans?
a) Spring beans are simple POJOs
b) Spring beans are managed by IoC container
c) Spring beans are instantiated and assembled
d) All of the above
86. JPQL is similar to
a) MySQL
b) HQL
c) iBatis
d) None
87. What is the main advantage of using Data Access Object ?
a) It provides access credentials to the data objects
b) It hides database specific implementation from the other layers of the application c) It always provides non jdbc specific implementation
d) It provides object modeling for data
88. Which component is used for request ?
a) RequestMapper
b) URLMapper
c) RequestMapping
d) RequestResolver
89. Which of the following technique that externalizes the creation and management of Component dependencies?
a) DAO
b) JNDI
c) IoC
d) None
90. Spring MVC which is the central servlet that receives requests and dispatchers then to the appropriate controllers ?
a) DispatcherServlet
b) Servlet
c) ActionServlet
d) None of the above
91. Which of the following file is required for configuring the database and the registration of entity classes? a) Web.xml
b) App-context.xml
c) Persistence.xml
d) None
92. What do you mean by HQL?
a) Hipertext Query Language
b) Hiperlink Query Language
c) Hibernate Query Language

93. How can you annotate a transaction ?
a) Transactional
b) Transactions
c) Transaction
d) None of the mentioned
94. How can we return contextual sessions ?
a) getSession() method
b) getCurrent() method
c) getCurrentSession() method
d) HibernateContext
95. In a web application, in terms of bean scopes, there are which scopes are available? a) Request
b) Session
c) Application
d) Above all
96. Which of the following is a correct SQL resultset mapping at the entity class?
a) @SqlResultSetMapping
b) @SqlResultSetExactor
c) @SqlReseltSet Query
97. How can you handle the shutdown of IoC container?
a) Using shutdownHandler()
b) Using registerShutdownHook()
c) Using registerHook()
d) Using shutdownHook()

98. Which of the following class is belongs to the Spring Jdbc module?
a) JdbcDaoSupport
b) JdbcTemplateSupport
c) JdbcTemplateDaoSupport
d) JdbcObjectDaoSupport
99. What is the starting point of Spring Boot Application?
a) @Service
b) @Controller
c) @SpringBootApplication
d) None of the Above
100. Which Maven command is used to run a Spring boot application?
a) maven spring-boot:run
b) Mvn spring: run
c) mvn spring-boot: run
d) None of the options
101. What is the spring boot default embedded server?
a) Undertow Server
b) Tomcat Server
c) Glassfish Server
d) Jetty Server
102. The annotation to be added to automatically configure beans based on the classes added to the class path is?
a) @AutoConfiguration
b) @EnableAutoConfiguration
c) @EnableConfiguration
d) None of the options

103. How primary key is annotated with attribute?
a) @Column
b) @Id
c) @PrimaryKeyNotNull
d) @PrimaryKeyNotNullAutoIncrement
104. What is the default method of @RequestMapping?
a) Pull
b) Patch
c) Post
d) Get
105. How to disable the default web server in the Spring Boot application? a) spring.main.web-server-type = none
b) spring.main.web-application-type = none
c) spring.main.application-type = no
d) spring.web-application-type = no-server
106. Which of the following are embedded containers supported by Spring? a) Undertow
b) Tomcat
c) Jetty
d) All of the above
107. Which of the following is the default HTML template engine in Spring Boot? a) ansa
b) Thymeleaf
c) JSP
d) None
108. Which of the following is not a spring boot layer?
a) Presentation Layer
b) Service layer
c) Persistence Layer
d) Business Layer
109. Why jdbcTemplate is used for?
a) Allow to issue any type of SQL statement
b) return any type of result
c) both a and b
d) None
110. Which of the following classes can you use for executing the SQL queries ? a) JDBCHelper
b) DBTemplate
c) DBHelper
d) JdbcTemplate
111. How to configure hibernate in spring boot?
a) h2
b) spring-boot-starter-data-jpa
c) Both a & b
d) None of the above
112. Spring-boot-starter-parent manage which of the following activities? a) Configuration - Java Version and other properties
b) Dependency Management - Version of dependencies
c) Default Plugin Configuration
d) All of the above

113. Which of the following annotation used for Restful Web Services? _ a) @Controller
b) @SpringBootApplication '
c) @RestController
d) All of the Above
114. Which of the following are Class level annotation?
a) @Controller
b) @Service
c) @Repository
d) All of the above
115. What is the purpose of Rest Template ?
a) create applications that consume RESTful Web Services
b) create applications that produced RESTful Web Services
c) Both A & B
d) None
116. How we can disable a specific auto- configuration class?
a) Using include attribute of @DisableAutoconfiguration
b) Using not exclude attribute of @DisabaleAutoConfiguration

c) Using not include attribute of @EnableAutoConfiguration
d) Using exclude attribute of atriableAutoCortfiguration
117. Which of the following annotation is used to bind application properties to the class fields? a) @ApplicationProperties
b) @ConfigurationProperties
c) @AppProperties
d) None of the above
118. Where we configure DispatcherServlet ?
a) In Beans configuration file
b) Web-inf/dispatcher.xml
c) Meta-inudispatcher.xml
d) In web.xml file
119. What is the starter for using log4j2 for logging?
a) Spring-boot-starter-logger
b) Spring-boot-starter-log
c) Spring-boot-starter-log4j2
d) None of the options
120. Which Annotation used for entity manager injection in EJB components? a) @Persistence
b) @PersistenceCon
c) @ PersistenceContext
d) None of the mentioned
121. Which you needed to build a RESTful Web Services?
a) Spring-boot-starter-rest
b) Spring-boot-starter-web.rest
c) Spring-boot-starter-web
d) None
122. What is the abbreviation of DTO ?
a) Database Objects
b) Data Transfer Objects
c) Data Objects
d) None

123. Which package contains the foundation of JDBC class? a) org.springframework.jdbc.core
b) org.springframework.jdbc.datasource
c) org.springframework.jdbc.object
d) org.springframework.jdbc.support
124. Do you think Spring Boot upgrades all dependencies automatically? a) True
b) False
